[[PDF Download]] A Shock To Your System Dangerous

Most people think of "shock"™ as emotional distress or sudden fright in response to a traumatic event. But in medical terms, shock is when you do not have enough blood circulating around your body. It is a life-threatening medical emergency. Some of the causes of shock include uncontrolled bleeding, severe burns and spinal injury.

Shock - Better Health Channel

HOW TO SHOCK THE POOL (CHLORINATE TO BREAKPOINT) Chloramines / Combined Chlorine If you smell "chlorine", coming from your pool, what you really smell are combined forms of chlorine, also called chloramines. Chloramines are chemical compounds formed by chlorine combining with nitrogen containing contaminants in the pool water.
