Breastfeeding and human milk are the normative standards for infant feeding and nutrition. Given the documented short- and long-term medical and neurodevelopmental advantages of breastfeeding, infant nutrition should be considered a public health issue and not only a lifestyle choice. The American ...

AASLD develops evidence-based practice guidelines and practice guidances which are updated regularly by a committee of hepatology experts and include recommendations of preferred approaches to the diagnostic, therapeutic, and preventive aspects of care.

Practice Guidelines | AASLD

A Norwegian study in 1928 had reported on the pathologic manifestations of untreated syphilis in several hundred white males. This study is known as a retrospective study, since investigators pieced together information from the histories of patients who had already contracted syphilis but remained untreated for some time.
