Nutrition is the science that interprets the interaction of nutrients and other substances in food in relation to maintenance, growth, reproduction, health and disease of an organism. It includes food intake, absorption, assimilation, biosynthesis, catabolism, and excretion. The diet of an organism is what it eats, which is largely determined by the availability and palatability of foods.

For over two millennia, the native people of the Andes mountain range have been using maca, also called Peruvian Ginseng, for longevity, fertility, and to treat a wide variety of ailments. Maca is typically baked, dried, powdered, mixed with milk, or cooked in various dishes. In recent years, more and more scientists and physicians have been conducting scientific and clinical studies on the ...
