American Journal of Aerospace Engineering (AJAE) is a peer-reviewed open access journal published bimonthly in English-language, providing a broad coverage of the materials and techniques employed in the aircraft and aerospace industry. This journal publishes original papers, review articles and short communications, including two major and overlapping branches: aeronautical engineering and ...

Any type of heat pipes can be used for low or cryogenic applications. Depending on the working fluids charged, cryogenic heat pipes can operate in a specific low temperature range, as shown in Table 1, which contains a list of the most commonly, used working fluids of heat pipes for cryogenic and low temperature applications, with some of their key thermal properties.

Photovoltaic thermal hybrid solar collectors, also known as hybrid PV/T (PVT) or solar cogeneration systems, are power generation technologies that convert solar radiation into usable thermal and electrical energy. Such systems combine a solar cell, which converts sunlight into electricity, with a solar thermal collector, which captures the remaining energy and removes waste heat from the PV ...

A coolant is a substance, typically liquid or gas, that is used to reduce or regulate the temperature of a system. An ideal coolant has high thermal capacity, low viscosity, is low-cost, non-toxic, chemically inert and neither causes nor promotes corrosion of the cooling system. Some applications also require the coolant to be an electrical insulator. ...
