Metrics for Implementing Automated Software Testing

Software quality measurement is about quantifying to what extent a system or software possesses desirable characteristics. This can be performed through qualitative or quantitative means or a mix of both.

Software quality - Wikipedia

The ST500 Profilometer provides fast large area measurement (without stitching) using a 400 mm X-Y axis travel with a maximum speed up to 200 mm/s.

PROFILOMETERS - NANOVEA

Software testing is an investigation conducted to provide stakeholders with information about the quality of the software product or service under test. Software testing can also provide an objective, independent view of the software to allow the business to appreciate and understand the risks of software implementation.
