BIOINFORMATICS AND ITS APPLICATIONS IN PLANT BIOLOGY - TAIR

CFP (pdf) The International Symposium on Bioinformatics Research and Applications (ISBRA) provides a forum for the exchange of ideas and results among researchers, developers, and practitioners working on all aspects of bioinformatics and computational biology and their applications.

12 th International Symposium on Bioinformatics Research

Bioinformatics is the use of information technology in biotechnology for the data storage, data warehousing and analyzing the DNA sequences. There is a tremendous application of bioinformatics in the field of homology and similarity tools, protein function analysis, personalised medicine, Gene therapy, Drug development, Comparative Studies and also climate change studies.

June 8 - 11, 2018 - Bioinformatics Research Group

These bioinformatics developments span from tools for genome annotation and function prediction, gene expression analyses, and databases of biological information, to the emerging fields of biomedical applications of research, including the development of new bioinformatics-based devices and predictive applications.

Bioinformatics Applications in Life Sciences and Technologies

The International Master of Bioinformatics of the UAB is an intensive and successful one year course dealing with the computing, statistical and biological fundamentals needed to carry out Bioinformatics in research centres and biotech companies

Real world applications of bioinformatics

Bioinformatics is an official journal of the International Society for Computational Biology, the leading professional society for computational biology and bioinformatics. Members of the society receive a 15% on article processing charges when publishing open access in the journal.

Fundamentals of Bioinformatics: computation, biology

Bioinformatics is an interdisciplinary research field that combines biology, computer science, mathematics and statistics into a broad-based field that will have profound impacts on all fields of biology. The emphasis of IJBRA is on basic bioinformatics research methods, tool development, performance evaluation and their applications in biology.
