The primary change for Method B in ISO 6892-1:2016 is the addition of a note addressing the region of the test where Method B or the stress rate shall be maintained.

ISO 6892-1:2016 Ambient Tensile Testing of Metallic Materials

In 2009, ISO 6892-1 introduced Method A, which is based on maintaining a strain rate. However many people were under the misapprehension that Method A is only achievable using equipment capable of closed-loop strain control.

In this part of ISO 6892, there are two methods of testing speeds available. The first, method A, is based on strain rates (including crosshead separation rate) and the second, method B, is based on stress rates. Method A is intended to minimize the variation of the test rates during the moment when strain rate
