Power Electronics Introduction Y. Baghzouz EE 442-642 Power Electronic System A power electronic system consists of power electronic switching devices, linear circuit elements, digital circuits, microprocessors, electromagnetic devices, DSPs, filters, controllers, sensors, etc. Ideal switch: controls energy flow with no loss.

Power Electronics Introduction

power electronics circuits on which the student will work may involve substantially larger voltages (up to hundreds of volts) due to the presence of large inductances in the circuits and the rapid switching on and off of amperes of current in the inductances.
