Tourists spend more than \$200 billion dollars in developing countries every year, placing tourism in the top five export income-earning categories for 83 percent of developing countries.

### **Sustainable Tourism | U.S. Agency for International**

Climate change is a change in the statistical distribution of weather patterns when that change lasts for an extended period of time (i.e., decades to millions of years). Climate change may refer to a change in average weather conditions, or in the time variation of weather within the context of longer-term average conditions, defined by the World Meteorological Organization as a 30 years or ...

The effects of climate change on hurricane frequencies and intensities have been the subject of much scientific investigation and inquiry. As they generate power from warm, moist air over warm ocean waters, hurricanes are becoming more intense as climate change continues to increase ocean temperatures.
