All Summer in a Day By Ray Bradbury - ESUHSD

Summer is the hottest of the four temperate seasons, falling after spring and before autumn. At the summer solstice, the days are longest and the nights are shortest, with day-length decreasing as the season progresses after the solstice. The date of the beginning of summer varies according to climate, tradition, and culture. When it is summer in the Northern Hemisphere, it is winter in the ...

An Indian summer is a period of unseasonably warm, dry weather that sometimes occurs in autumn in the Northern Hemisphere. Indian summers are common in North America, Europe and Asia. The US National Weather Service defines this as weather conditions that are sunny and clear with above average temperatures, occurring September to November. It is usually described as occurring after a killing frost.
