Receipt Parser SDK - Extract Data, Parse Receipts in PDF

The fundamental difference between XML and JSON is that XML is a meta-language and JSON is a markup language. That is, XML syntax is designed specifically to have no inherent semantics. Particular element names don't mean anything until a particular processing application processes them in a particular way.

what is the difference between json and xml - Stack Overflow

xml-to-json() function requires the input XML to use this vocabulary, though this can of course be generated by transforming XML in a different vocabulary. Two new data types are introduced maps and arrays.
